PROFESSIONAL EXPERIENCE

Dell Technologies 2023-2026

Lead - Portfolio Strategy, Business Planning and AI Analytics | Galt, CA | July 2023 – May 2026

Owned analytics, dashboard, and AI workflow automation initiatives for a \$16B+ enterprise server portfolio, improving visibility into revenue, margin, pipeline, and operational performance.

- Reduced manual labor by over 50% human hours by prototyping and deploying automation and AI-assisted workflows that streamlined a 2-person, 80-hour-per-week process into a scalable 1-person operation.
- Developed machine learning and forecasting models achieving 90%+ accuracy across key business metrics, validating business value and accelerating adoption of data-driven operating decisions.
- Partnered directly with sales, finance, operations, and portfolio leaders to understand workflows, identify high-value use cases, prioritize backlog items, and define success metrics for customer and operational decision making.
- Owned the roadmap for automated dashboards, KPI frameworks, and executive reporting capabilities providing visibility into revenue, margin, pipeline, and operational performance.
- Built AI-enabled decision support workflows and agentic automation that surfaced revenue opportunities and business risks from large-scale transactional and performance datasets.

MBA Intern | Austin, TX | June 2022 – August 2022

- Developed a pricing and decision framework to evaluate discount strategy effectiveness, identify improvement opportunities, and support profitability-focused product decisions.

Asociacion Chilena De Seguridad (Hospital) | Santiago, Chile | October 2020 – April 2021

Commercial Strategy and Operations Manager

- Led cross-functional transformation initiatives focused on growth, customer experience, and operational performance in a healthcare environment, driving change adoption across teams and processes.
- Partnered with leadership teams to redesign customer-facing processes, improving sales by 20% and service efficiency by 60% through clearer workflows, operating changes, and stakeholder alignment.

Moller y Perez Cotapos | Santiago, Chile | 2012-2020

Associate Director of Business Development | April 2018 – June 2020

- Led a team of 7 analysts, establishing operating cadence, prioritization, and execution processes supporting acquisition and evaluation activities; acquired 10 properties worth \$64.6M.
- Led strategic partner relationships across 22 projects, aligning business, financial, and execution priorities that contributed to 60% profit growth for the business unit.
- Designed automated forecasting and financial modeling tools improving forecast accuracy by 50% and reducing execution time by 25%, strengthening data-driven planning and evaluation.
- Coordinated complex cross-functional work across contracts, finance, legal, and investment partners to remove dependencies and keep strategic initiatives moving.
- Managed governance-heavy contract processes requiring structured communication, risk balancing, and alignment across internal and external stakeholders.

Business Development Manager | April 2017 – April 2018

- Developed and presented investment and commercial strategy approved by the board, shaping portfolio priorities and supporting acquisition of 9 properties totaling \$57M.
- Negotiated and structured commercial agreements and joint venture terms with investment partners, coordinating legal, finance, and operating stakeholders; closed 8 deals totaling \$40M and 11% initial ROI.
- Managed complex stakeholder coordination and negotiations balancing business objectives, execution timelines, and risk considerations.
- Oversaw sourcing, analysis, and evaluation of 1.2K real estate opportunities worth \$4.2B, building a scalable pipeline for investment decisions.
- Developed financial evaluation models supporting larger-scale multi-year development investments.

Product Manager | August 2014 – April 2017

- Led cross-functional execution across commercial, marketing, construction, and development stakeholders, improving customer acquisition and sales performance by 25%.
- Managed competing priorities, stakeholders, and delivery across multiple initiatives and timelines.
- Coordinated internal and external partners to remove bottlenecks and maintain launch timelines.
- Negotiated operational agreements supporting cost, delivery, and commercial objectives.

Development Engineer | July 2012 – August 2014

- Conducted market research and financial modeling on hundreds of properties yearly

EDUCATION and TRAINING

University of Michigan - Stephen M. Ross School of Business

Master of Business Administration MBA, 2023 | Awarded Dean's Fellowship (Merit Full-Tuition Scholarship)

Universidad Catolica de Chile

Bachelor of Business Administration BBA, 2012 | Awarded Honors Scholarship | Graduated top 11%

ADDITIONAL

- AI and Automation: Built AI-enabled and agentic workflow systems using Hermes, Copilot, Claude, Codex, and ChatGPT to automate workflow execution across business and personal applications.
 - Built a Plaid-connected personal finance application combining structured and unstructured data, AI-assisted workflows, and user-facing decision support.
 - Built automation using Android ADB and orchestration tools for scheduled and on-demand execution, including rapid prototyping of operational workflows and multi-step agents.
- Analytics and Data: SQL, Python, Excel, Power BI, workflow mapping, product analytics, performance reporting, prompt engineering
- Fluent in Spanish and English
- Proposed in front of the castle at Magic Kingdom
- Avid skier and mountain biker
- Taekwondo Blue-Red Belt
